

Thursday 7<sup>th</sup> May 2020

Dear Parents and Families,

I hope this newsletter finds you and your families well. I have been very impressed with the fantastic work that many pupils are completing at home and the ingenious ways that children and families are finding to extend their learning. Well done keep up the good work!

Well done also to all parents and families for all their hard work ensuring that children are still learning and growing we understand just how difficult this can be. Remember to contact your teachers using Class Dojo if you need any support with the tasks that are set for your children, they will be happy to help.

In this strange time, I thought it would be nice to share some of this fabulous work along with some stories and activities from our pupils across the Trinity.

Whilst the vast majority of children are currently learning at home, we do have a few keyworker children at Duchy of Lancaster school. These children have been busy creating some fantastic art work including this beautiful playground artwork.

We would like to thank Baytree of Hilgay for the generous donation of these beautiful plants and planting materials which the children enjoyed plating around school. We would also like to thank Mrs. Farr, a parent at Duchy, & Morrisons @ Diss for their very kind donation of Easter eggs to the keyworker children and staff attending school in the Easter holidays.

Henry from Duchy of Lancaster school, has been so inspired by the achievements of Captain Tom that he decided to set his own fundraising challenge. He intends to 'Run a mile a day for the month of May'.

His intention is to raise at least £1000 for the N.H.S. and for Cystic Fibrosis. To do something so positive, at this uncertain time is incredible. Well done Henry! If you would like to donate to help him achieve his goal...and possibly, to smash it, here is the link: <https://uk.virginmoneygiving.com/fundraiser-display/showROFundraiserPage?userUrl=HenryGoodall1&pageUrl=1>

Children from Oak class at Weeting have been busy with their learning with lots of science experiments and creating power point presentations about London for Geography.

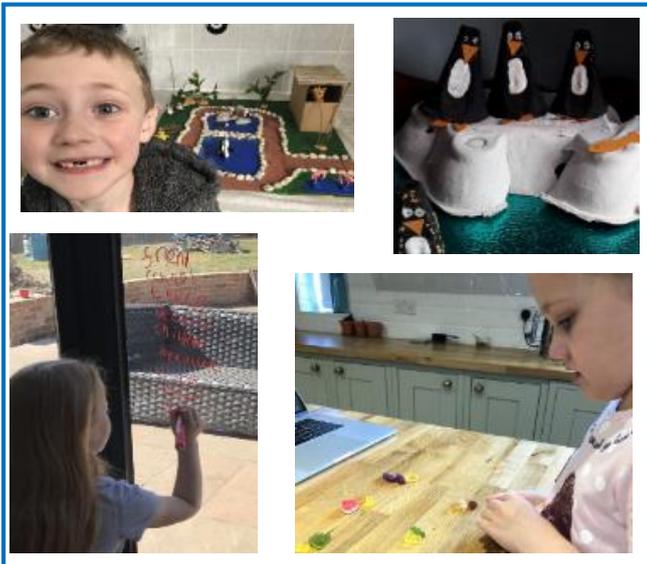

## The Trinity Partnership

Over at The Norman Primary School and since we are celebrating VE day this week Starlings class teacher, Miss Vaughan, sent home some wartime recipes home for the children to try. Madie made her dinner from the recipes and said they were actually fairly tasty.

Patricia has been enjoying science by creating fireworks in a glass. She started warm water then mixed together oil and food colouring. Then slowly dropped the solution into the warm water and watched it create fireworks.

Freddie in Robins class has created his very own vegetable patch. He has sown lots of seeds and is enjoying his first crop of radishes.

Thomas, also in Robins class created a map of the village. They then went for a bike ride to read the road names and added these to his map too. What a great way to explore your local Geography.

From Hedgehog class at Duchy of Lancaster George and his family have been working together to build his own zoo as part of their topic work. All of the animals are built out of clay.

Alianna has been using junk to create her favourite animal.

Sienna has been finding creative ways to practice her spellings.

Isla has been using sweets to help her with her maths work.

Please do continue to share your work & stories with your teachers via Clasdojo we love seeing what you have been up to.

Take care and stay safe!

Best wishes

Owen Rhodes

Executive Headteacher
